WHAT IS CLAIMED IS:

- 1. An electrochromic device, comprising:
 - (a) a first substantially transparent substrate having an electrically conductive material associated therewith;
 - (b) a second substrate having an electrically conductive material associated therewith;
 - (c) an electrochromic medium contained within a chamber positioned between the first and second substrates which comprises:
 - (1) a solvent;
 - (2) a cathodic electroactive material;
 - (3) an anodic electroactive material, wherein at least one of the anodic and cathodic electroactive materials is electrochromic; and
 - (4) a color-stabilizing additive; and
 - (d) wherein the electrochromic device exhibits an absolute value of Δa^* of less than 3.00 after being exposed to 85 degrees centigrade for approximately 4,300 hours.
